18	Objective of the Course:	The content of the course draws on multiple disciplines including philosophy, applied ethics, management, organization theory and economics. The course offers a series of conversations aimed at viewing organizations from an ethical perspective and discussing the link between ethics and business. The course will begin with an overview of foundational concepts such as rights, justice, utilitarianism, stakeholder management and social contract theory as well as a review of ethical decision-making. The course also aims to discuss the nexus between ethics and culture and ethics and environment. The core concepts will be applied to business practices that involve dilemmas faced my managers and employees in various organizational contexts including (un)ethical leadership, motivation, emerging technologies, managing diversity, and having a global presence.
