Measurement and Evaluation Techniques Us Course	sed in the	the official institutions where they can practice in the field of Science in groups of 10-15 people. It is essential that the picture correspondence between these institutions and the dean's office has been completed. The institutions that the science teacher candidates are guided within the scope of this course may be BUGES, Bursa Science and Technology Center, Science Museums, Blood Centers, Secondary Schools affiliated to the Ministry of National Education. Students meet at the faculty for 1 hour a week with the instructor. In the theoretical teaching process of the course, lecture, discussion, question-answer, methods are applied. Students have to fulfill the tasks assigned to them in the institution where they are placed, 2 hours a week. The students create a semester work schedule with the director of the institution where they are placed, and the students are present at the institution on the day and time determined every week in accordance with this calendar. The student has no right not to go to the institution without an excuse. He takes notes about the work he has done in the institution every week he goes, and makes a self-evaluation. At the end of the semester, he brings together these notes, organizes them and presents them as an individual report to the lecturer. Quantification and consideration: In the assessment and evaluation of the course, 1 homework / project (40%) (selection file consisting of self-assessment, weekly reports and end-of-term report) and 1 final exam (60%) are taken into consideration. The success of the students as a result of the evaluation to be made at the end of the term is entered into the university's automation system and the results are evaluated with the "absolute" system. Letters are entered manually and announced to the student.
