18	Objective of the Course:	Definition of hypersensitivity, immunodeficiency and autoimmune diseases in animals	
19	Contribution of the Course to Professional Development:	Since many autoimmune diseases are important, especially in small animal medicine, the course should be taken by these physicians.	
20	Learning Outcomes:		
		1	Ability to explain the mechanism of hypersensitivity.
		2	Ability to be able to define and to compare the types of hypersensitivity
		3	To define molecules and cells attend to hypersensitivity, and to comment allergies again to food, drug, vaccine and parasite.
		4	Being able to define the relationship blood transfusion and hypersensitivity in animals's
		5	To be able to interpret the basic mechanism of type III hypersensitivity important in veterinary medicine
		6	Ability to define to comment diagnostic reactions based on type IV hypersensitivity
		7	To be able to define immunodeficiency mechanisms and to explain the role and importance in veterinary medicine
		8	To be able to define autoimmunity mechanisms and to explain the role and importance in veterinary medicine
