18	Objective of the Course:	To teach zoogeographic regions in the world and the evolutionary process affecting distribution
19	Contribution of the Course to Professional Development:	Students who complete this program learn about the distribution areas of animals and the factors affecting their distribution.
20	Learning Outcomes:	
	1	To be learnt distributional diversity of animals
	2	To be learnt ecological relations in species distribution
	3	To have adequate information on evolutionary process
	4	To be learnt life zones over the world
	5	To be learnt zoogeographical zones and its original species
	6	To be learnt phytogeographical zones and its original species
	7	To be able to evaluate evolutionary process at species level
