	E	CONO	METRICS II						
1	Course Title:	ECONO	METRICS II						
2	Course Code:	EKO3104							
3	Type of Course:	Compuls	sory						
4	Level of Course:	First Cyc	le						
5	Year of Study:	3							
6	Semester:	6							
7	ECTS Credits Allocated:	5.00							
8	Theoretical (hour/week):	3.00							
9	Practice (hour/week):	0.00							
10	Laboratory (hour/week):	0							
11	Prerequisites:	No							
12	Language:	Turkish							
13	Mode of Delivery:	Face to face							
14	Course Coordinator:	Prof. Dr.	Mustafa Sevüktekin						
15	Course Lecturers:	Prof. Dr. Mustafa Sevüktekin, Doç. Dr. Kadir Yasin Eryiğit, Doç. Dr. Mehmet Çınar, Doç. Dr. Özer Arabacı							
16	Contact information of the Course Coordinator:	sevuktekin@uludag.edu.tr Uludağ Universitesi İktisadi ve İdari Bilimler Fakültesi Ekonometri A.B.D. 16059 Görükle/Bursa Türkiye Telephone: +90 224 2941160

17									
17	Objective of the Course:	The stud of multip models a	lents should get the skills of construction and development le regression models, get acquainted with some non-linear and special methods of econometric analysis and on, understanding the area of their application in economics.						
		The stud of multip models a	lents should get the skills of construction and development le regression models, get acquainted with some non-linear and special methods of econometric analysis and						
18	Objective of the Course: Contribution of the Course to	The stud of multip models a	lents should get the skills of construction and development le regression models, get acquainted with some non-linear and special methods of econometric analysis and						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a	lents should get the skills of construction and development le regression models, get acquainted with some non-linear and special methods of econometric analysis and						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a estimatio	lents should get the skills of construction and development le regression models, get acquainted with some non-linear and special methods of econometric analysis and on, understanding the area of their application in economics.						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a estimatic	In the second se						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a estimation 1 2	In the second se						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a estimatic 1 2 3	In the second se						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a estimatic 1 2 3 4 5 6	In the second se						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a estimatic 1 2 3 4 5 6 7	In the second se						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a estimatic 1 2 3 4 5 6 7 8	In the second se						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a estimation 1 2 3 4 5 6 7 8 8 9	In the second se						
18 19 20	Objective of the Course: Contribution of the Course to Professional Development: Learning Outcomes:	The stud of multip models a estimatic 1 2 3 4 5 6 7 8	In the second se						
18	Objective of the Course: Contribution of the Course to Professional Development:	The stud of multip models a estimatic 1 2 3 4 5 6 7 8 9 9 10	 To be able to use Basic skills of econometric analysis and on, understanding the area of their application in economics. To be able to use Basic skills of econometric analysis To be able to understand econometric methods To be able to understand econometric approaches, ideas, results and conclusions To be able to use The tools needed to build multiple linear regression model To be able to understand Small sample properties of regression model To be able to understand Functional forms of regression model To be able to understand Structural breaks To be able to understand Structural breaks To be able to understand Structural breaks 						
18 19 20	Objective of the Course: Contribution of the Course to Professional Development: Learning Outcomes:	The stud of multip models a estimatic 1 2 3 4 5 6 7 8 9 9 10	In the second se
