18	Objective of the Course:	The aim of this course is to teach the basic concepts of human anatomy, to make the anatomical definition of topographic body parts, to learn the bone, muscle, joint, vascular and nerve structures in each region; To gain the basic anatomy knowledge required especially for the functional anatomy of the motion system.	
19	Contribution of the Course to Professional Development:	Knowledge of the anatomy of the musculoskeletal system and the anatomy of the peripheral nervous system is the basic infrastructure knowledge in the maintenance of the profession. It creates a foundation for learning and applying functional (functional) anatomy knowledge.	
20	Learning Outcomes:		
		1	To know the bone and joint structures in body parts, to describe their properties and functions
		2	To know the muscular, peripheral nervous and vascular structures in body parts, to define their functions and properties
