

DEEP EXCAVATIONS AND RETAINING STRUCTURES

1	Course Title:	DEEP EXCAVATIONS AND RETAINING STRUCTURES	
2	Course Code:	INS5075	
3	Type of Course:	Optional	
4	Level of Course:	Second Cycle	
5	Year of Study:	1	
6	Semester:	1	
7	ECTS Credits Allocated:	6.00	
8	Theoretical (hour/week):	3.00	
9	Practice (hour/week):	0.00	
10	Laboratory (hour/week):	0	
11	Prerequisites:		
12	Language:	Turkish	
13	Mode of Delivery:	Face to face	
14	Course Coordinator:	Doç. Dr. YEŞİM SEMA ÜNSEVER	
15	Course Lecturers:		
16	Contact information of the Course Coordinator:	unsever@uludag.edu.tr 0224 2942946	
17	Website:		
18	Objective of the Course:	Earth retaining systems for deep excavations. Water pressure acting on earth retaining systems and related problems. Lateral earth pressure acting on earth retaining systems. Lateral supporting elements: Ground anchors and struts. Types, components, production and installation, dimensioning, bearing capacity, corrosion protection, testing and pre-stressing of anchors. Lateral and vertical displacements of adjacent ground. Modes of failure of retaining systems. Sloped excavations in soil and rock. Instrumentation and monitoring of deep excavations. Soil nailing: system description and design.	
19	Contribution of the Course to Professional Development:	This course teaches retaining systems for deep excavations and also types of retaining structures.	
20	Learning Outcomes:		
		1	Be able to learn the types of deep excavations and retaining structures
		2	Be able to learn deep excavations and retaining structures applications
		3	Be able to calculate the forces acting on retaining structures
		4	Be able to learn the design criteria
		5	Be able to apply various methods to calculate the stability of the retaining walls and excavations
		6	Be able to design of retaining walls
		7	
		8	
		9	
		10	
21	Course Content:		
		Course Content:	
Week	Theoretical	Practice	

1	Introduction	
2	Typical retaining walls; Gravity walls, Cantilever walls, Butressed walls, Reinforced earth walls	
3	Theory of Lateral earth pressure	
4	Stability problems of retaining structures	
5	Application and design of retaining structures	
6	Types and application of retaining walls at deep excavations	
7	Pore pressure effect on retaining structures	
8	Modern retaining structures; Anchors, Sheet piles, and their stabilities	
9	Modern retaining structures; Anchors, Sheet piles, and their stabilities	
10	Diaphragm walls, applications and stability	
11	Piled walls and their systems	
12	Reinforced earth walls and applications	
13	The analysis of in-situ retaining walls and placement of instrumentations and monitoring the structures	
14	Design examples	

22	Textbooks, References and/or Other Materials:		R.S.Sinha, Underground Structures, Elsevier, 1989; E.Ariöçlü ve A.O.Yılmaz Cözümlü problemlerle verildi		
Activites			Number	Duration (hour)	Total Work Load (hour)
Theoretical		R	14	3.00	42.00
Practicals/Labs			0	0.00	0.00
Self study and preperation		0	14	9.00	126.00
Homeworks			1	10.00	10.00
Final Exam Projects		1	60.00	0.00	0.00
Field Studies			0	0.00	0.00
Contribution of Term (Year) Learning Activities to Midterm exams Success Grade			40.00	2.00	2.00
Others			0	0.00	0.00
Contribution of Final Exam to Success Grade			60.00	2.00	2.00
Final Exams			1	2.00	2.00
Total Work Load					182.00
Measurement and Evaluation Techniques Used in the Course			Written exams of numerical and theoretical assignments		6.00
ECTS Credit of the Course					6.00
22-2010-17 WORK LOAD TABLE
