PAF	RTIAL DIFFERENTIAL	EQUA	TIONS AND ENG. APPLICATIONS					
1	Course Title:	PARTIAI APPLICA	. DIFFERENTIAL EQUATIONS AND ENG.					
2	Course Code:	MAK524	7					
3	Type of Course:	Optional						
4	Level of Course:	Second	Cycle					
5	Year of Study:	1						
6	Semester:	1						
7	ECTS Credits Allocated:	6.00						
8	Theoretical (hour/week):	3.00						
9	Practice (hour/week):	0.00						
10	Laboratory (hour/week):	0						
11	Prerequisites:	none						
12	Language:	Turkish						
13	Mode of Delivery:	Face to f	ace					
14	Course Coordinator:	Prof. Dr.	YAŞAR PALA					
15	Course Lecturers:	Prof.Dr.	Yaşar PALA					
16	Contact information of the Course Coordinator:	Prof.Dr. Yaşar PALA mypala@uludag.edu.tr						
17	Website:							
18	Objective of the Course:	The objective of the lecture is to teach the analytical or computational methods of partial differential equations and to make it possible for students to gain the ability of setting up the physical modelling of the engineering problems.						
19	Contribution of the Course to Professional Development:	The objective of the lecture is to teach the analytical or computational methods of partial differential equations and to make it possible for students to gain the ability of setting up the physical modelling of the engineering problems.						
20	Learning Outcomes:							
		1	Presenting application areas and the general solution methods of partial differential equations as a common subject.					
		2	Giving the success of the using the knowledge of Mathematics, basic sciences and engineering.					
		3	Giving the success of defining, modelling and solving of the problems in mechanical engineering and other areas.					
		4	Inouculating a global point of view to the science with the engineering first.					
		5						
		6						
		7						
		8						
		9						
		10						
21	Course Content:	_						
		Co	ourse Content:					
Week	I heoretical		Practice					
1	Basic principles. First order partial di equations. Applications.	merential						

2	Class condit	assifications of equations and boundary nditions.																
3	Orton	onormal Functions.																
4	Applic	lications of Fourier method.																
5	Proble geom	oblems including cylindrical and spherical eometry.																
6	proble	blems																
7	Contir	ontinuous eigenvalues and Fourier integrals						s										
8	Lapla	ce t	ransfo	orms														
9	Repea	epeating courses																
10	Trans proble	ransform methods for boundary value roblems.																
11	Greer	n fui	nction	s and	gene	ralised	functi	ons.										
12	Nume	erica	al Met	hods														
13	Nume	umerical Methods																
14	Gene	ral e	evalua	ation														
22	Textbooks, References and/or Other Materials:						1- D 2- K 1	1-Prof.Dr. Yaşar PALA , Modern Uygulamalı Diferensiyel Denklemler (Turkish), Nobel Yayıncılık, 2006. 2-Prof.Dr. Yaşar PALA , Fizikçiler ve Mühendisler için Kısmi Diferensiyel Denklemler (Turkish), U.Ü.Yayınları, 1996.
