AGRICULTURAL ELECTRIFICATION

1	Course Title:	AGRICULTURAL ELECTRIFICATION	
2	Course Code:	BSM4813-S	
3	Type of Course:	Optional	
4	Level of Course:	First Cycle	
5	Year of Study:	4	
6	Semester:	7	
7	ECTS Credits Allocated:	3.00	
8	Theoretical (hour/week):	2.00	
9	Practice (hour/week):	1.00	
10	Laboratory (hour/week):	0	
11	Prerequisites:	No prerequisites	
12	Language:	Turkish	
13	Mode of Delivery:	Face to face	
14	Course Coordinator:	Prof. Dr. ALİ VARDAR	
15	Course Lecturers:	Yok	
16	Contact information of the Course Coordinator:	Prof. Dr. Ali VARDAR e-posta : dravardar@uludag.edu.tr Telefon: 0 224 2941605 Adres: Bursa Uludağ Üniversitesi, Ziraat Fakültesi, Biyosistem Mühendisliği Bölümü, Görükle Kampüsü, 16059, Nilüfer/BURSA	
17	Website:		
18	Objective of the Course:	To teach the basics of electrical power, and the usages of this energy in agriculture. Introductory definitions relating to agricultural electrification, the state of agricultural electrification of Turkey and the potential of electrical energy, General meaning of agricultural electrification, electricity network, electricity power-stations. Introduction to electro technique, application areas of electricity in agricultural fields (Agricultural lighting, cooling, ventilation, heating, cooking, practicing and electrical motors).	
19	Contribution of the Course to Professional Development:	It contributes to the student's ability to learn and perform electrical and electronic applications in agricultural fields.	
20	Learning Outcomes:		
		1	To be able to comprehend the production ways of electrical energy and the basic magnitudes and concepts of electricity
		2	To be able to determine the appropriate installed power and transformer power concepts of the enterprise
		3	Ability to select the motor by determining the electric motor power of a work machine
		4	To be able to determine the heating, lighting, electrical ventilation elements and applications of an agricultural enterprise
		5	
		6	
		7	
		8	
		9	
		10	

21	Course Content:	
	Course Content:	
Week	Theoretical	Practice
1	Introduction to Electricity	Solved problems about the subject
2	Power, current, voltage, resistance and power circles in direct and alternating current, the effects of electrical energy, generators, direct current generators, alternating current generators, defining the power of established power plant.	Solved problems about the subject
3	Important technical terms regarding the generation and consumption of electrical energy, feeding villages and farms through power grid, transformer stations, power distribution units used in villages and farms, conductors, poles and isolators, determination of the best suitable conductor cross section area, low voltage grids.	Solved problems about the subject
4	General electrification, The definition of agricultural electrification, Electric installation.	Solved problems about the subject
5	The types of power generators, Hydraulic power plant, thermal power plant, solar power plant, nuclear power plant, wind plant, the classifications of power plants due to the region they are set up, Village plants, City	Solved problems about the subject
6	The uses of electrical energy in agriculture: techniques of electrical illumination and	Solved problems about the subject
7	The technique of electrical aeration and applications in agriculture,	Solved problems about the subject
8	applications in agriculture,	
9		
10	The technique of electrical heating and infrared radiation and applications in	Solved problems about the subject
11	Electrical motors and their uses in agriculture,	Solved problems about the subject
12	incubators, automated mangers, automated manure cleaners, transportation mechanisms,	
	power, electrified fences.	
13	Internal fitting and its characteristics	Solved problems about the subject
14	The electrical security measures to be taken during agricultural electrification applications. Electrical power saving precautions	Solved problems about the subject

Activites	Number	Duration (hour)	Total Work Load (hour)
Theoretical	14	1.00	14.00
Practicals/Labs	14	2.00	28.00
Self study and preperation	3	4.00	12.00
Homeworks	2	2.00	4.00
Projects	0	0.00	0.00
Field Studies	0	0.00	0.00
Midterm exams	1	15.00	15.00
Others	0	0.00	0.00
Final Exams	1	15.00	15.00
Total Work Load			103.00
Total work load/ 30 hr			2.93
ECTS Credit of the Course			3.00
