

DATA SECURITY

1	Course Title:	DATA SECURITY
2	Course Code:	BM6025
3	Type of Course:	Optional
4	Level of Course:	Third Cycle
5	Year of Study:	1
6	Semester:	1
7	ECTS Credits Allocated:	6.00
8	Theoretical (hour/week):	3.00
9	Practice (hour/week):	0.00
10	Laboratory (hour/week):	0
11	Prerequisites:	none
12	Language:	Turkish
13	Mode of Delivery:	Face to face
14	Course Coordinator:	Prof. Dr. PINAR KIRCI
15	Course Lecturers:	yok
16	Contact information of the Course Coordinator:	Bilgisayar müh. bölüm binası 1. kat oda 110 pinarkirci@uludag.edu.tr
17	Website:	
18	Objective of the Course:	To teach the basic concepts and principles of information security, the security requirements of information systems and methodological design strategies for security.
19	Contribution of the Course to Professional Development:	At the end of this course the student will Understand the basics of the security services and cryptographic protocols. Learn the necessary skills for a secure system design and knowledge necessary to assess the security of a system.
20	Learning Outcomes:	
	1	Basic security notions: confidentiality, integrity, availability, Security threats, hacking, social engineering, legal and social issues
	2	Operational and physical security issues, security policy formation and enforcement, Basic concepts of cryptography: encryption, hash functions, public key encryption, Authentication models: password-based, token-based, biometrics-based authentications
	3	
	4	
	5	
	6	
	7	
	8	
	9	
	10	
21	Course Content:	
	Course Content:	
Week	Theoretical	Practice

1	Basic security notions: confidentiality, integrity, availability	
2	Security threats, hacking, social engineering, legal and social issues	
3	Operational and physical security issues, security policy formation and enforcement	
4	Basic concepts of cryptography: encryption, hash functions, public key encryption	
5	Authentication models: password-based, token-based, biometrics-based authentications	
6	Authorization models: discretionary access control, role based access control, mandatory access control	
7	Program security: malwares, basic notions of secure programming	
8	Program security: malwares, basic notions of secure programming	
9	Operating system security: protection models, security kernels, malware protection	
10	Operating system security: protection models, security kernels, malware protection	
11	Network security: firewalls, intrusion detection and response systems	
12	Network security: firewalls, intrusion detection and response systems	
Activites		
Theoretical		
Management in network environments		
Practicals/Labs		
Self study and preperation		
Homeworks		
Projects		
Field Studies		
Midterm exams		
Assesment		
Others		
Final Exams		
Total Work Load		
Quiz		
Total work load/ 30 hr		
ECTS Credit of the Course		
Final Exam		
Total		
Contribution of Term (Year) Learning Activities to Success Grade		
Contribution of Final Exam to Success Grade		
Total		
Measurement and Evaluation Techniques Used in the Course		
24	ECTS / WORK LOAD TABLE
