

# FLUID POWER SYSTEMS AND CONTROL

|    |   |   |
|----|---|---|
| 1  | Course Title:   | FLUID POWER SYSTEMS AND CONTROL   |
| 2  | Course Code:  | MAK5243   |
| 3  | Type of Course:   | Optional  |
| 4  | Level of Course:  | Third Cycle   |
| 5  | Year of Study:  | 1   |
| 6  | Semester:   | 1   |
| 7  | ECTS Credits Allocated:                                 | 6.00  |
| 8  | Theoretical (hour/week):                                | 3.00  |
| 9  | Practice (hour/week):                                   | 0.00  |
| 10 | Laboratory (hour/week):                                 | 0   |
| 11 | Prerequisites:  | None  |
| 12 | Language:   | Turkish   |
| 13 | Mode of Delivery:                                       | Face to face  |
| 14 | Course Coordinator:                                     | Prof. Dr. ELİF ERZAN ERZAN TOPÇU  |
| 15 | Course Lecturers:                                       | Doç. Dr. Gürsel ŞEFKAT  |
| 16 | Contact information of the Course Coordinator:          | Prof. Dr. Elif ERZAN TOPÇU<br>Bursa Uludağ Üniversitesi<br>Mühendislik Fakültesi Makine mühendisliği Bölümü<br>Görükle BURSA<br>Tel: 0224 29 41990<br>e-mail: erzan@uludag.edu.tr                     |
| 17 | Website:  |   |
| 18 | Objective of the Course:                                | Introducing fluid power transmission systems widely used in the industrial field, examining the characteristics of their basic elements and understanding the design of hydraulic/pneumatic circuits. |
| 19 | Contribution of the Course to Professional Development: | Recognizes the fluid power transmission systems widely used in the industrial field, learns the characteristics of its basic elements and understands the design of hydraulic / pneumatic circuits.   |
| 20 | Learning Outcomes:                                      |   |
|    | 1   | To be able to comprehend the basic components of fluid power transmission systems and their role in integrity.  |
|    | 2   | To understand the design features and criteria of fluid power transmission systems.   |
|    | 3   | To be able to define the symbols of the elements used in fluid power transmission systems   |
|    | 4   | Understanding the control methods and cycles of these systems   |
|    | 5   |   |
|    | 6   |   |
|    | 7   |   |
|    | 8   |   |
|    | 9   |   |
|    | 10  |   |
| 21 | Course Content:   |   |
|    | Course Content:   |   |

| Week   | Theoretical  | Practice       |                 |                        |
|--|--|----------------|-----------------|------------------------|
| 1  | Giving information about the course content, introducing fluid power systems   |                |                 |                        |
| 2  | Basic components and system elements of hydraulic  |                |                 |                        |
| 3  | Types of hydraulic pumps, motors and cylinders, their basic equations.   |                |                 |                        |
| 4  | Types of hydraulic pumps, motors and cylinders, their basic equations.   |                |                 |                        |
| 5  | Problem solving for hydraulic circuits   |                |                 |                        |
| 6  | Hydraulic valve systems, investigation of motion equations of hydraulic valve-cylinder system                            |                |                 |                        |
| 7  | Examination of motion equations of hydraulic pump-cylinder, pump-motor systems, closed loop control of hydraulic systems |                |                 |                        |
| 8  | Application for simulation of hydraulic systems  |                |                 |                        |
| 9  | Laboratory work and examination of closed loop system.   |                |                 |                        |
| 10   | Basic components, equations and usage areas of pneumatic systems   |                |                 |                        |
| 11   | Valves used in pneumatic systems, cylinder systems, pneumatic circuits   |                |                 |                        |
| 12   | Examination of motion equations of pneumatic valve-cylinder system and closed  |                |                 |                        |
| Activites  |  | Number         | Duration (hour) | Total Work Load (hour) |
| Theoretical  | control  | 14             | 3.00            | 42.00                  |
| 11   | Student presentations  |                |                 |                        |
| Practicals/Labs  |  | 0              | 0.00            | 0.00                   |
| Self study and preparation                                       | Textbooks, References and/or Other   | 1              | 5.00            | 5.00                   |
| 22   | Homeworks  | 4              | 12.00           | 48.00                  |
| Projects   |  | 3              | 0.00            | 0.00                   |
| Field Studies  |  | 0              | 0.00            | 0.00                   |
| Midterm exams  |  | 1              | 10.00           | 10.00                  |
| Others   |  | 0              | 0.00            | 0.00                   |
| Final Exams  | Assesment  | 1              | 10.00           | 10.00                  |
| 23   | Total Work Load  |                |                 | 180.00                 |
| Total work load/ 30 hr   |  |                |                 | 6.00                   |
| ECTS Credit of the Course  |  |                |                 | 6.00                   |
| Quiz   |  | 0              | 0.00            |                        |
| Home work-project  |  | 4              | 30.00           |                        |
| Final Exam   |  | 1              | 60.00           |                        |
| Total  |  | 6              | 100.00          |                        |
| Contribution of Term (Year) Learning Activities to Success Grade |  | 40.00          |                 |                        |
| Contribution of Final Exam to Success Grade                      |  | 60.00          |                 |                        |
| Total  |  | 100.00         |                 |                        |
| Measurement and Evaluation Techniques Used in the Course         |  | Exam, homework |                 |                        |
| 24   | ECTS / WORK LOAD TABLE   |                |                 |                        |

| 25  | CONTRIBUTION OF LEARNING OUTCOMES TO PROGRAMME QUALIFICATIONS |     |       |     |     |          |     |     |        |      |      |             |      |      |      |      |
