## **ENGINEERNG IN ANCIENT PERIOD**

	ENGINEER		NANCIENT PERIOD								
1	Course Title:	ENGINE	ERNG IN ANCIENT PERIOD								
2	Course Code:	ARK0519									
3	Type of Course:	Optional									
4	Level of Course:	First Cycle									
5	Year of Study:	2									
6	Semester:	3	3								
7	ECTS Credits Allocated:	4.00									
8	Theoretical (hour/week):	3.00									
9	Practice (hour/week):	0.00									
10	Laboratory (hour/week):	0									
11	Prerequisites:	None									
12	Language:	Turkish									
13	Mode of Delivery:	Face to face									
14	Course Coordinator:	Prof. Dr. İBRAHİM HAKAN MERT									
15	Course Lecturers:										
16	Contact information of the Course Coordinator:	Uludağ Üniversitesi Fen-Edebiyat Fakültesi Arkeoloji Bölümü Görükle- Bursa 16059 0.224.2941839/ e-mail: guvengumgum@uludag.edu.tr									
17	Website:										
18	Objective of the Course:	The main purpose of the course is to introduce of the ancient engineering and technologies which were used especially in architecture and construction activities. Besides ancient shipbuilding and lighting technologies and warfare techniques will also be examined.									
19	Contribution of the Course to Professional Development:	Students will gain intellectual development, to recognize the developments in the field of engineering since the existence of humanity.									
20	Learning Outcomes:										
		1	Recognizing of the ancient construction techniques and practices.								
		2	Understanding of the technological progress of construction practices from the beginning until the Late Antiquity.								
		3	To know building requirements.								
		4	Recognizing of the tools and technologies which were used in ancient architecture								
		5	Understanding of organisation schema of ancient building projects.								
		6	Recognizing of management system of ancient quarries in Roman Period.								
		7	Recognizing of the large-scale ancient substructure projects such as road, drainage and sewer systems.								
		8									
		9									
		10
