18	Objective of the Course:	1. install and use the programming language(Delphi) 2. To know portions of the screen as Component palette, properties palette, toolbars 3. can use basic components. the components can edit visually 4. Can use properties and events of Components 5. can using variables, control statements and loops when writing the program 6. to understand related to the class and object consept terms and use
19	Contribution of the Course to Professional Development:	About learning Rapid aplication (RAD) software desing tool using and developing
20	Learning Outcomes:	
	1	Recognizes parts of the programing environment as menus, palettes and toolbars, functions knows
	2	Moves on to form the basic components, make appropriate arrangements on the form.
	3	knows that each component have many features and sensitive to many mouse and keyboard events
	4	make storage, operating,recall of the standart operations
	5	Recognizes components , uses appropriate components to solutions its expected , design stage feature make assignments.
	6	The desired solutions Design and them, writing code that makes appropriate events relate.
	7	Identifies and uses the necessary variables.
	8	If necessary, uses control statements and loops.
	9	Program runs and tests. Corrects syntax and runtime errors.
	10	on the files and folders performs operations filing as cut, copy, paste, save, open, delete
