18	Objective of the Course:	To teach the fundamental descriptions of the human anatomy, to define the topographical body regions, to comprehend the bones, muscles, joints, vessels, nerves and glands if it present located therein, them to grasp the formation of the pre-clinical and clinical approach to enable connectivity to other courses, to facilitate.	
19	Contribution of the Course to Professional Development:		
20	Learning Outcomes:		
		1	To define the topographical body regions and to description the normal anatomic constructions and functions located in the topographical body regions
		2	To show the variations and ratios of the anatomical constructions
		3	To Interpret the locations and functional relationships of the anatomical constructions and to define the anatomical basic concepts of some clinical applications
		4	To acquire with the information that can be helpful in the evaluation and interpretation of same clinical cases
